

# New FSC® Certified Sheet Products

## Sustainable business from sustainable labelling

Our new FSC-certified combinations meet market demand for environmentally responsible labelling that satisfies the highest quality standards.

These products replace existing grades, from now onwards.

The mark of responsible forestry

FSC (the Forest Stewardship Council®) is an international non-governmental organisation founded in 1993, whose task is to support environmentally appropriate, socially beneficial, and economically viable management of the world's forests. Forests certified against FSC standards are located in more than 60 countries. The Council has defined ten general principles of forest management. The actual certification standards are drawn up in accordance with the FSC principles in a national cooperation process. Fulfilling the FSC standard requires independent third-party verification. More information: [www.fsc.org](http://www.fsc.org).
